

Google Map of area by house

- Yellow lines indicates where most trees uprooted and snapped. Center line is where most damage occurred that I sent pics for. There was a definite NW direction for the *path*. The outside yellow lines are boundaries for where I have seen trees are down.
- Our house at green star. Approximate elevation is 8700 ft.
- Overlook Road is the brown snaking line on the pic above. It is generally at the top of a ridge. Google map grey line for Overlook Rd. is off a bit.
- I've heard there are a low of trees down on Indian Springs Road
- Yellow star is a microwave tower for reference. High point of Overlook Rd about 8760ft.

Google Map of area South of Overlook Rd.

- Yellow star is microwave tower for reference
- Yellow lines indicates that I sent pics where most trees uprooted and snapped. Center line is where most damage occurred that I sent pics for. There was a definite NW direction for the *path*. The outside yellow lines are boundaries for where I have seen trees are down.
- Probably 100+ trees down at bottom of center yellow line. This is in the bottom of a steep sided valley. This valley is Dry Gulch on the Sherman Hills West topo map. Most trees fell pointing ~west. Essentially all other trees pointing ~northwest.
